

RECENS HABITÆ iij

Cōplures n. veluti ex crescentiæ lucidæ vltra lucis tenebrarūq; confinia in partē obscurā extēdunt, & cōtra tenebricosæ particulæ lumē ingrediūtur. Quinimo, & magna nigricatiū macularū exiguarū copia, oīno a tenebrosa parte separatarū, totam fere plagā iā Solis lumine pfusam vndiquaq; cōspigit, illa saltem excepta parte, q̄ magnis, & antiquis maculis est affecta. Adnotauimus aut, modo dictas exiguas maculas in hoc semper, & omnes cōuenire, vt partē habeāt nigricatē locū Solis respiciētē, ex aduerso aut Solis lucidiorib. terminis, q̄ candētib. iugis coronētur. At consimilē penitus aspectū habemus in Terra circa Solis exortū, dū valles nōdū lumine pfusas, mōtes vero illas ex aduerso Solis circundātes iā iā splēdore fulgētes intuem̄: ac veluti terrestriū cavitatū vmbraē Sole sublimiora petente iminuūtur, ita & Lunares istæ maculæ, crescēte parte luminosa tenebras amittunt.
